Meridian Labs - Customer Support SLA Policy (v3.2)

Owner: Head of Customer Success | Effective: 1 July 2026

1. Purpose

This policy sets the response and resolution targets for customer support tickets at Meridian Labs. Every ticket must get a first human response inside the target time for its tier.

2. Response targets by tier

Tier	First response	Resolution	Coverage
Free	24 hours	72 hours	Business hours, Europe team
Pro	8 hours	48 hours	Business hours, regional team
Enterprise	4 hours	24 hours	24/7, regional team

3. Regional coverage

- NA tickets go to the NA team (Austin office).

- Europe tickets go to the Europe team (Helsinki office).

- LATAM tickets go to the LATAM team (Bogota office).

- **APAC tickets are routed to the Europe queue. Meridian Labs has no APAC support team yet. The Europe team picks up APAC tickets from 08:00 CET. A local APAC team is planned for Q2 2027.**

4. Escalation

- If a Pro or Enterprise ticket has no first response after 75% of its target time, the system escalates it to the regional team lead.

- If a ticket breaches its first response target, the Customer Success Manager must contact the account inside 24 hours.

- Two or more breaches for one account in 30 days put the account on the churn-risk watch list.

5. Measurement

First response time = hours from ticket creation to the first human reply. SLA compliance is reported every month per region and per tier. Target: 95% of tickets meet the first response target in every region.

6. Review

This policy is reviewed every 6 months. Next review: January 2027.
